

KAMI SAM WATCHES

Always know what to watch next.

A personal TV-show tracker for iPhone & iPad. It remembers exactly where you left off in every series, tells you the moment something new airs, and turns your watch history into stats worth bragging about.

- Native SwiftUI
- Powered by TMDB
- TV Time import
- iOS 26

UPCOMING

Release dates, before your group chat knows.

One clean timeline of what's airing next — live from TMDB, with **season premieres called out** and relative dates you read at a glance.

18 JUL

The Bear
Season 5 · Episode 3
Tomorrow

29 JUL

The White Lotus
Season 4 · Premiere
PREMIERE

SEARCH & TRACK

Any show on Earth, two taps away.

Search the full TMDB catalog as you type, tap **Track** to follow, and toggle any episode watched from season pages with per-season progress.

↓

TV Time import

Drop in your TV Time export ZIP — the app matches every show to TMDB and skips anything already logged. Thousands of episodes, zero duplicates.

📅

Calendar reminders

Tap "Notify Me" on any upcoming episode and it lands in your Google Calendar — the night it airs, your phone already knows.

Stop scrolling. Start watching.

Every show, every episode, every air date in one fast, native app — the only decision left is the couch or the bed.

Track your first show
